NOS-01	NOS, NMFS, OAR Acquisition Management Division in Silver Spring	Aerial Photography - Need mapping quality aerial photography over the U.S. coastline and over airports across the U.S. This photography requires specialized aerial mapping cameras. Brooks Act procedures should be used.	2.5M	No	No	Promote Safe Navigation	2513	OR&F	Yes	George Leigh	713-3167	National Geodetic Survey	NL0000	N/NGS	Required date is January 1, 2003. This requirement was advertised as a RFI by Don Moses on Jan 28, 2002 in the FBO. Only a few responses came in. For this five-year requirement we have divided the country into four areas. We would like to award two of the areas to small business and have the other two full and open competition. The problem is that we don't know which way to divide the areas. Don Thompson suggested waiting until the submittals come in to make the area decision.

NOS-24	NOS, NMFS, OAR Acquisition Management Division in Silver Spring	The Marine Chart Division requires a flexible, large scope, multi-year umbrella type contract that provides on-site cartographic support to all phases of nautical chart production. We expect the level of contract support to continue to increase as appropriations are targeted to more and more contract services. A brief description of similar services provided in the past is included here for reference. MCD's first onsite contract for cartographic support services started in October 1995 with two CaddScan (now called EIS) employees. In the last seven years contract support has risen to as much as two contracts running concurrently with 31 onsite contractors, and has fallen to one contract with as little as seven onsite contractors. At present MCD has one contract (50-DDNC-9-90021) with 20 onsite contractors providing cartographic support services which supplement cartographic capacity in both raster and ENC production. The services provided by these 20 (soon to be expanded to 29)onsite contractors provide for approximately	15,000,000	No	No	Promote Safe Navigation	2513		Yes	Tracy Sanford and Alexandra Heliotis	713 2745x146	NOAA/NOS/OCS/ Marine Chart Division	NJ2000	N/CS2	MCD's first onsite contract for cartographic support services started in October 1995 with two CaddScan (now called EIS) employees. In the last seven years contract support has risen to as much as two contracts running concurrently with 31 onsite contractors, and has fallen to one contract with as little as seven onsite contractors. At present MCD has one contract (50-DDNC-9-90021) with 20 onsite contractors providing cartographic support services which supplement cartographic capacity in both raster and ENC production. The services provided by these 20 (soon to be expanded to 29) onsite contractors provide for approximately 20 percent of the Division's cartographic capacity. This contract ends December 31, 2002 and after that date MCD no longer has a contract ehicle for cartographic support services. Requisition number NCNJ-2000-2-00002, submitted to procurement in July 2001, was meant to complement and then ultimately replace contract 50-DDNC-9-90021. MCD anticipates 35 to 40 on site
